p. 71-79. (Abstract available)

DESCRIPTORS: *Aluminum compounds, Oxides,
*Refractory materials, *Corundum, Manufacturing
methods.

It is possible to manufacture light-weight corundum
materials from alumina, with a wide range of specific
weights. Best materials are produced from pre-fired
and finely ground alumina. A specific feature of light-
weight corundum technology is (if compared with the
production of compact materials) the low strength of
the raw material and the large shrinkage during the
